Views vary from each unit and there is no assurance of the views from any particular unit. Ceiling heights are measured from top of floor slab to underside of ceiling slab. Additionally, ceiling height measurements exclude those areas where any soffits, moldings, drop and/or suspended ceilings and/or light fixtures may be installed. As such, the referenced ceiling height may not represent actual ceiling clearance. Many services provided will be offered on an à la carte basis, with charges for use required. From time to time, price changes may have occurred that are not yet reflected on this brochure. Please check with the sales center for the most current pricing. Stated dimensions are measured to the exterior boundaries of the exterior walls and the centerline of interior demising walls and in fact vary from the dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior air space between the perimeter walls and excludes interior structural components). For your reference, the area of the Unit, determined in accordance with those defined unit boundaries, is set forth on Exhibit 3 of the Declaration. Note that measurements of rooms set forth on this floor plan are generally taken at the greatest points of each given room (as if the room were a perfect rectangle), without regard for any cutouts. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. All dimensions are approximate and may vary with actual construction, and all floor plans and development plans are subject to change.
